

COVID-19: Resources

Current coronavirus advice from NaTHNaC, UKHSA and FCDO, with links to international information sources

COVID-19 is a disease caused by SARS-CoV-2 and is mainly transmitted from human to human by breathing in droplets or aerosols emitted from the nose or mouth of an infected person or by touching the infected droplets on surfaces, then touching the eyes, nose or mouth. COVID-19 cases are now reported worldwide.

A number of useful resources and documents are available for travellers and health care professionals.
