New TravelHealthPro video tour

A short video guide highlighting key website features and resources

We have developed a 3 minute [video guide of TravelHealthPro](#). This short tour demonstrates how to find some of the key resources and features. TravelHealthPro contains lots of helpful information. In addition to specific advice for each country, you can find outbreak surveillance information, news items, and a range of articles with advice on staying healthy during overseas travel.

We hope this video will be helpful for travellers and health professionals who are new to using the website and for those who have not explored further than the country information pages.
